File: "Response to DCI"

30 June 1980

ST

MEMORANDUM FOR: Director of Central Intelligence

FROM : PB/NSC Coordinator

SUBJECT : Tuesday SCC on Iran and Miscellaneous Items

25X1

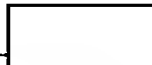

1. Attached are folders, as noted below, with material for your use/review. 

2. Specifically, these folders contain material on the following:

a. SCC on Iran. This meeting is scheduled for 0900, Tuesday, 1 July. In this folder, on the left side, you will find the papers circulated by the NSC. On the right side you will find talking points prepared by NFAC. Additional talking points, as appropriate, will be developed overnight and will be provided you with your morning material--I have asked the Iran Task Force to include in this material some comment, arising from your question of last Friday, regarding the possibility for partial releases of the hostages. (In order to "get the juices flowing again" you might want to consider having a debrief sometime tomorrow after your return.) *yes*

✓ b. PRC on US Relations with Somalia. The material in this folder is provided per your request in your note to me this morning. This PRC was never held (it was scheduled and postponed twice). On the left side of the folder is your 10 June memo. On the right side is the material pulled together by NIO/AF and DD/CT that had been intended for use at that meeting.

✓ c. Ethiopia: Intentions Toward Somalia. In the Pre-Brief last Friday, you asked for some more information on this subject. Attached is a memo prepared by NIO/AF in response to that request. In particular it provides background on the Ethiopian-Somalia dispute over the Ogaden as well as additional information on Ethiopian planning for operations both against Somalia and in Eritrea.

SECRET NOFORN

- d. DCI Questions on the IA "The South Pacific: Unhurried Moves Toward Regionalism". Attached on the left side of this folder is the IA with the questions you noted on the cover. On the right side is a memo prepared by OPA/EAP, in response to your questions. Immediately following his memo is a revised map with latitude and longitude displayed (many people I talked to had a similar problem in referring to the map in the IA without these lines drawn in). With regard to the possible treatment of this topic as a filler item for the next Presidential Brief:

25X1A

- Do you want to use the revised map as a graphic? or

- Would you like to have a few copies of the IA reprinted to include the revised map, so that could be used as handouts?
